

Safeguarding the Digital Generation

FUTURES CLOUD

Using the latest in cloud technology Futures Cloud provides a dynamic and intelligent active monitoring software solution based on word and phrases capture that ensures your school is keeping children and young people safe when they use your ICT.

Featuring an intuitive user interface that visually displays problematic activity or behaviour and advanced incident management Futures Cloud ensures that safeguarding managers can instantaneously and easily identify potentially concerning incidents in the e-learning environment and take action immediately.

SAFEGUARDS YOUR INSTITUTION FROM:

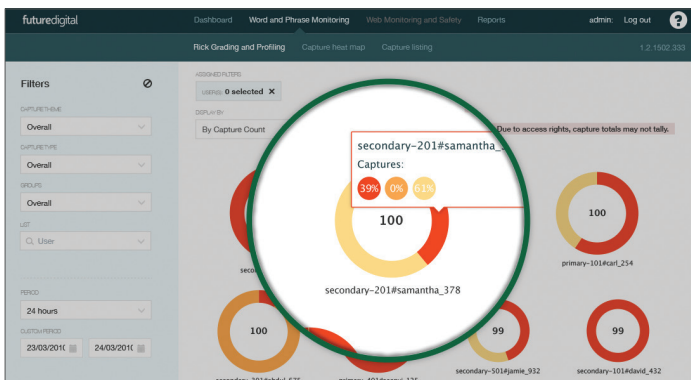

- Inadvertent exposure to inappropriate web content such as **sex, violence** or **radicalisation**.
- Peer-to-peer **cyberbullying**.
- Instances of grooming including radicalisation and **sexual threats**.
- Inappropriate or **harmful behaviour** on social media apps.
- Exposure to **racist, homophobic** or extreme language.
- Deliberate access to inappropriate web sites.
- Accessing online **gambling and shopping** sites.
- Alerts institutions to real world issues that young people may be experiencing e.g. **domestic violence, neglect** etc...

SAFEGUARDING AGAINST POTENTIAL RISK:

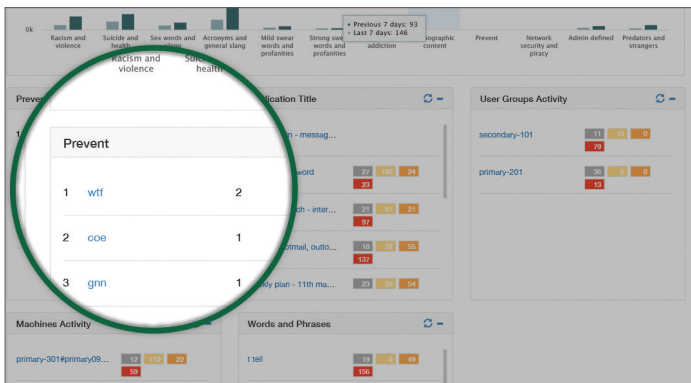

CAPTURE HEATMAPS

Futures Cloud provides a groundbreaking user interface that displays a visual representation of captured data. Capture heatmaps display the volume & risk level of word and phrase captures in intuitive and easily interpreted colour coded representation ensuring that potential safeguarding risks can be identified instantaneously.

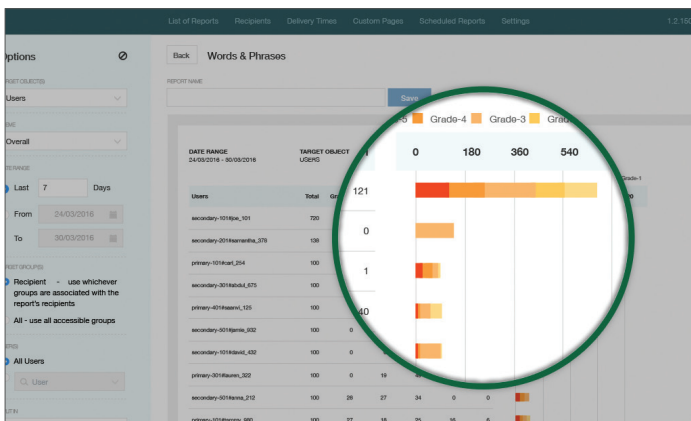

AUTO PRE-GRADING FUNCTION

Futures Cloud can be set to automatically pre-grade captures. This leading edge feature of the software performs a real-time 'risk' analysis of new captures and applies a grade automatically. This capability ensures that teachers and safeguarding managers can assess instances of potential risk swiftly as well as vastly reducing the time spent on risk assessment.

PREVENTING RADICALISATION

Futures Cloud features an inbuilt module that has been specifically devised to help safeguard young people against the risks of exposure to extremism and radicalisation in the online environment. Future Digital's Prevent Library has been developed with multi-agency support in accordance with the Counter-Terrorism Act 2015, Keeping Children Safe in Education guidelines and Ofsted's Common Inspection Framework.

ADVANCED REPORTING

Futures Cloud's advanced reporting provides a fully customisable and easy-to-configure reporting module. Advanced reporting features a range of highly graphical reports that clearly illustrate patterns of behaviour, activity trends and instances of potential risk. Futures Cloud can be set to deliver scheduled reports.
